Education

2022 - 2025 | COLÉGIO TÉCNICO DE LIMEIRA - UNICAMP
Technical Program in Systems Development integrated with High School, focused on OOP and APIs

Professional Experience

WATERFY PARTNERS PARTICIPAÇÕES S.A. **Feb 2026 - Present**
Full Stack Developer (Flutter / Java)

- Develop the front-end of CustomerFy, a web-based commercial management system for sanitation companies, in Flutter Web and Dart as my main focus
- Build and modernize screens and UI components with Material 3, using Provider for state management and integrating with REST APIs (Spring Boot and legacy Java API)
- Built the Help module in Flutter, bringing together release notes, manuals, downloadable apps, training materials, and video tutorials
- Restructured customer records to support multiple emails, phone numbers, and addresses, with changes across the Flutter front-end, the Java back-end, and the PostgreSQL database
- Migrated and refactored the Java back-end from Java 8 to Java 25, modernizing legacy code
- Agile methodology with two-week sprints on Azure DevOps, Git version control, pull requests, and code review

Technologies: Flutter Web, Dart, Provider, GoRouter, Dio, Java, Spring Boot, Kotlin, PostgreSQL, Keycloak, Firebase, Azure DevOps, Google Cloud Storage, JasperReports, GWT, Git.

COLÉGIO TÉCNICO DE LIMEIRA - UNICAMP **Nov 2024 - Dec 2025 • 1 yr 2 mos**
Teaching Assistant - Systems Development

- Guided students through systems development projects and programming questions
- Supported the organization and administration of course assessments
- Provided technical support for the school's IT infrastructure

ALFA NETWORKS DO BRASIL LTDA. **Jan 2024 - Mar 2024 • 3 mos**
Technical Support - Internship

- Provided hardware and software user support, installed and configured systems, and handled support tickets

Personal Projects

LUMEREAD Flutter • Riverpod • Hive
Offline-first EPUB e-book reader for Android and iOS with no data collection, featuring highlights and notes, text-to-speech, a built-in dictionary, reading statistics, and themes. Being published on Google Play.

PROMETHEUS Astro • prometheus-lemon.vercel.app
Free, open-source educational platform that explains science through interactive simulations, from the basics to high school level, starting with physics and geography.

Academic and Institutional Projects

COLÉGIO TÉCNICO DE LIMEIRA - UNICAMP

- Developed an interactive project to present the Systems Development program at the COTIL Open House (COPA)
- Created and taught workshops on programming, Git/GitHub, Figma, and electronics for program classes and at educational events such as FECITEC and Arduino Day
